## Open for 2021

By Lynne Hanton OAM

We love this time of the year as we see our students returning and meeting new students and parents. Everyone seems taller more confident and rested. The studios will be full of energy as our excited young dancers can't wait to see who their teachers are and to dance. Their new leotard usually makes it just that much better. *It is a well known fact that a new leotard makes you dance better and stand taller - no matter your age.*

It takes time to get everyone settled into their new level and know which studio they will be in for which class.

*We are amused ourselves at the beginning of each year because our students move to a new level and have a new coloured leotard which can be very confusing.*

*Summer Intensives* begin on Monday for the dancers in the Ballet Company. It is important to build their strength after a well earned rest. They will begin rehearsals for *La Fille mal Gardée*, a very funny ballet about a very naughty daughter. Our teachers perform with the ballet company and Summer Intensives allow them to regain their fitness and work out muscle soreness before demonstrating new ballet exercises to students beginning a new level of dance.

Our website address is [dupradadancecompany.com.au](http://dupradadancecompany.com.au) or [australiandanceacademy.com.au](http://australiandanceacademy.com.au). If you become a member and join our website you will have access to the latest news, important dates, photographs etc. Lynne does occasionally write a blog or a mail-out to keep everyone in the loop. Ballet Parents often don't have a ballet or dance background so the website keeps both parents, students and young dancers in mind. We are also very proud having the only working Ballet Company in the world for quite a long time last year. Most Ballet Companies and Schools are back to normal in Australia this month. The International story is still not so good.
